ABOUT

Developer, small business owner, lover of Lord of the Rings, cats, and all things politics. Started with C# but have fallen in love with ruby.

Being almost entirely self-taught, I was given extraordinary opportunities to learn and grow my skills over the past couple of years. During that time, I've been able to become a better developer, and develop a passion for delivering solutions of the highest quality and to the satisfaction of the customer.

SKILLS

LANGUAGES

Ruby, C#, PowerShell, C++

FRAMEWORKS

Ruby-on-Rails, .Net (Core, Standard, Full), ASP.Net (MVC & Web API)

WEB DESIGN AND MANAGEMENT

HTML, CSS/LESS/SASS, JavaScript, jQuery, REST/SOAP, HAML, DNS

INFRASTRUCTURE

Azure, Digital Ocean, Heroku, Amazon Web Services

DATA

Microsoft SQL, PostgreSQL, MySQL, and Redis

VERSION CONTROL

Git, Team Foundation Version Control

TECHNOLOGIES, TOOLS AND SERVICES

Entity Framework, Docker, Splunk, AppDynamics, ServiceNow, JIRA, and SendGrid

EXPERIENCE

COVERMYMEDS

Software Developer

May 2018 - Present

RESPONSIBILITIES

- Design and develop web applications and APIs for internal support software and the CoverMyMeds product line.
- Contribute to and improve revision control and deployment in a fast-paced, agile environment.
- Review code changes of fellow developers. Reviewed separately for code quality and risk analysis.

OHIO DEPARTMENT OF PUBLIC SAFETY

Software Development Specialist 4

Jan 2017 - May 2018

Software Development Specialist 3

Oct 2015 - Jan 2017

Software Development Specialist 2

Oct 2014 - Oct 2015

Software Development Specialist 1

Apr 2014 - Oct 2014

College Intern

Nov 2013 - Apr 2014

RESPONSIBILITIES

- Gather requirements, architect, and implement enterprise-level systems. Systems included multiple applications on internal and external networks that were used by people throughout the department and State of Ohio, respectively. All systems followed a department template and stuck to defined standards.
- Rewrite legacy systems into efficient modern systems using the latest department standards. Attempt to simplify process workflows and automate manual tasks performed by employees as much as possible.
- Provide customer support to internal users and external customers who consumed Public Safety's online services.
- Mentor fellow developers and interns, delegate and prioritize their tasks, track their progress and review their final products on a daily basis.
- Lead a team of full-time developers and consultants, under the direction of my supervisor, to solve problems that were thrown our way.
- Monitoring, troubleshooting, and resolution of production issues using department software such as Splunk and AppDynamics.
- Research and recommend technologies for wider adoption among the IT department.

PROJECTS

- Driver License System as architect and lead developer
- BMV Finance System as architect and lead developer

MYTHCODERS, LLC

Chief Information Officer & Co-Owner

Nov 2015 - Present

Chief Executive Officer & Owner

Feb 2011 - Nov 2015

ABOUT

A Microsoft BizSpark start-up/small business that I co-own with a business partner. We provide software development and web design services for personal and small business needs. I started it high school to publish apps to the Windows Phone store. Expanded scope in 2015 with my best friend by offering technical support and device repair.

RESPONSIBILITIES

- Oversee all Information Technology operations including: web development, mobile app development, general software development, web design, hosting, in-home tech support, device diagnostics and repair.
- Monitor and support systems used by employees including JIRA and Office 365.
- Assist Chief Executive with ownership and operations of the company and its employees.
- Collaborate with other department heads and executives to ensure company goals are met.
